**Bureau of
Child Support**

Section A
Child Support

CHILD SUPPORT

The Bureau of Child Support helps Indiana's children and families by enforcing parental responsibility through the collection of payments by non-custodial parents. The Child Support Program provides a full range of child support services including establishment of paternity, establishment and enforcement of child support orders, collection and distribution of child support payments, and location of absent parents.

Title IV-D (Child Support and Establishment of Paternity) of the Federal Social Security Act, enacted in 1975, required that a Child Support Program be established in every state that chose to participate in the IV-A programs. The Child Support Program became effective in Indiana on October 1, 1976 under the provisions of IC-12-17-2. The Indiana Child Support Program is administered by the Child Support Bureau of the Indiana Division of Family and Children within FSSA.

In Indiana, the Child Support Bureau has entered into cooperative agreements with the local county prosecutors in all Indiana counties to provide child support enforcement services. The Bureau also has cooperative agreements with the Clerks of Circuit Courts for collecting support payments and with several courts to set up Special Hearing Officers specifically to adjudicate Title IV-D cases.

Every child has the right to the care and support of both parents whether or not the parents are married or both in the home. The child support program enforces this right. Child support services are offered through local County Prosecutors' Offices. These services include:

- Locating absent parents
- Establishing paternity
- Establishing and enforcing support orders
- Establishing and enforcing medical support orders
- Collecting current and past due support payments
- Review and adjustment of current support orders

This program is available free of charge to anyone receiving TANF, Hoosier Healthwise or Medicaid for their children. Parents receiving TANF or Medicaid for their children are required to pursue child support services (the IV-D program) through the local County Prosecutor's Office.

Any other family that is in need of these services can receive them for a one-time application fee of \$25.00. Anyone interested in receiving these services can do so by contracting their local County Prosecutors Office. In order to receive the child support services of the Prosecutor's office, it is critical that all necessary information is provided by the person applying for services. All information requested is necessary in order to provide the best possible service. All information provided is strictly confidential.

CHILD SUPPORT

The Child Support Program has several tools available to enforce child support obligations. These tools include:

- Income withholding
- Liens of property
- Interception of income tax refunds (state and federal)
- Interception of unemployment compensation benefits.
- Interception of lottery winnings
- Credit bureau reporting
- Driver and professional, and recreational license suspension
- Financial institution data cross matching
- New hire reporting
- Computer automation of its operations, including interfaces with numerous other computer systems.
- Child support action plans in all 92 local offices aimed at improving communications with local child support offices and improving service to the public.
- An automated child support system
- A web site for employers to process income withholding on line.

The impact of the Child Support Program collection efforts for the citizens of Indiana can be seen in the collection figures for the State Fiscal Year ending June 30, 2003. During this year the Child Support Bureau collected \$431,459,817. During the first year of operation, the Bureau collected \$5,700,000. These increased collections mean more Indiana children are receiving the child support they deserve and that fewer Indiana families will have to resort to public assistance to survive.

At the end of June, 2003, there were 506 employers using the Child Support payment web site. Additionally, there were an uncounted number of employers remitting payments through electronic funds transfers. Electronic direct deposit of payments for distribution of collections was initiated in November, 2000. Electronic fund transfers from employers were initiated February 1999. Through the first six months of the calendar year 2003, an estimated \$45.3 million had been collected.

During State Fiscal Year 2003, new and improved features were incorporated in the Bureau's Child Support KIDS Line (800) 840-8757 or (800) 840-KIDS. These features include the following:

- More incoming phone lines (from 32 to 48)
- Choice of English or Spanish
- Access via SSN or ISETS case number
- Recent payment information from all payers or just one
- Mail dates of payments
- How to set up direct deposit for state-posted payments
- Options to find out about adjustments and payer refunds
- A federal and state offset option
- How to obtain verification of child support income
- Information about complaint procedures.

Each year, the Office of Child Support Enforcement (OCSE) reviews performance for order establishment, paternity establishment, current support collected, and cases paying on arrears. The performance-based audit standards were phased in between FFY 2000 and 2002. In each area performance is assessed by comparing the number of cases upon which action is to be taken with those upon which the required action has been taken, as reported in the ISETS database.

For example, for order establishment, the number of cases upon which orders need to be established is compared with the number of cases upon which an order has been established. The performance is measured as a percentage. Paternity establishment is measured by taking the denominator from the prior fiscal year.

CHILD SUPPORT

Indiana continues to improve performance measure scores in all areas. This has resulted in increased incentives received by Indiana from the federal government. Please refer to the attached Indiana Statewide Performance and Incentives Report comparing Indiana's performance scores to the national averages as well as detailing Indiana's scores from 2000 – 2003. For SFY 2003, 47 Indiana counties were at or above the national average of 58% for current support. For specific county performance measures and scores please refer to the attached County Performance Measure report for FFY 2000 – 2003.

The reliability of Child Support data in the Indiana State Enforcement Tracking System (ISETS) determines the effectiveness of the Child Support Program and the incentive monies received. Regardless of how high Indiana's performance ratios are in the four substantive areas, in order to actually qualify for incentives; the state must first demonstrate that its system data is at least 95% accurate. OCSE makes this determination by randomly selecting approximately 200 cases statewide. The paper case files are reviewed and compared to the ISETS system data, as of September 30. The auditors review the system data to ensure that, among other things, all court order information is reflected correctly in ISETS and that all paternity indicators are accurate. Cases are reviewed for accuracy for each of the four substantive measures.

In 2001 data reliability issues were identified. There were a number of factors contributing to this issue. Factors included but were not limited to the following:

- 1) Data conversion from the prosecutors and clerk's data into the ISETS system.
- 2) Miscommunication between child support staff and local office staff resulting in incorrect paternity data codes being entered in the Indiana Client Eligibility System (ICES) thus affecting the paternity establishment percentage in the ICES/ISETS interface.
- 3) Insufficient data being entered into ICES for non-custodial parents resulting in the interface between ISETS and ICES creating an entire new case instead of linking to an existing case already in the system. This created duplicate cases.

In a successful effort to address the data reliability issues, state and county child support staff reviewed and corrected approximately 145,000 cases. Also, a training program for local office of family and children staff was initiated and developed with input from child support in an effort to address this issue on a on-going basis. These collaborations contributed to successful results in addressing the problem as documented in the Indiana Statewide Performance and Incentives Reports detailing the progressive improvement in the data reliability scores from Federal Fiscal Year 2000 – 2002.

CHILD SUPPORT

Child Support Data

Indiana State Enforcement Tracking System (ISETS) is a statewide reporting system for child support payments. The system collects, posts, and disperses support payments for all Indiana counties. Child Support data is tracked by court orders and reported by child support payments.

A court order could involve multiple children, multiple payors and or multiple families/households. Also, IV-D cases are tracked for federal reporting purposes but non IV-D cases are not. Consequently data regarding the total number of families and children served by this program is not available.

For additional information about the Child Support program please visit the following websites:
